

O thou, my Muse! Guid auld Scotch drink,
Whether through wimplin' worms thou jink,
Or, richly brown, ream o'er the brink,
In glorious faem,
Inspire me, till I lisp and wink,
To sing thy name!

Robert Burns - Scotch Drink (1785)

Whisky

The name derives from the Gaelic "usquebaugh", meaning "Water of Life". This was phonetically transformed first into "usky", then "whisky-bar" and eventually Whisky.

Scotland has internationally protected the term "Scotch". For a whisky to be labelled Scotch it has to be both produced and matured in Scotland. The maturation must take place in oak casks for a period of at least 3 years and one day and it may not be bottled if it is less than 40% alcohol by volume.

Legend has it that St Patrick introduced distilling to Ireland in the fifth century AD and that the secrets travelled with the Dalriadic Scots when they arrived in Kintyre around AD500. St Patrick probably acquired the knowledge in Spain and France, countries that might have known the art of distilling at that time.

Types of whisky

There are two main categories of whisky – single and blended. Single means that all of the product is from a single distillery, while blended means that the product is composed of whiskies from two or more distilleries. Traditional practices define five types:

Single malt whisky is 100% malted barley whisky from one distillery, distilled in batches in pot stills.

Single grain whisky is distilled at a single distillery from water and malted barley, with or without whole grains of other cereals and must not meet the requirements of a single malt whisky.

Blended malt whisky is a blend of single malt whiskies from two or more distilleries.

Blended grain whisky is a whisky created by mixing grain whiskies from more than one distillery.

Blended Scotch whisky is a mixture of single malt whisky and grain whisky, distilled at more than one distillery.

How to drink whisky

There is no right or wrong way to drink Scotch whisky - it's all down to personal taste, however, here are a few suggestions:

Many who drink whisky neat say they do not want to spoil the taste by adding water. However, equally as many will say that adding a touch of water, serves to enhance the distinctive aroma and flavour of a whisky, softening it up to help make the individual flavours more accessible. In some areas tap water contains high amounts of chlorine and therefore would not complement a whisky, so it is best to opt for bottled mineral water, which we offer complimentary with our whiskies if you prefer (please just ask). Adding ice to a whisky can be considered a shame because it will only dull the fine taste and wonderful aromas. Similarly, carbonated water is not an ideal accompaniment for whisky as it may also interfere with the aromas.

All of our whiskies are served in 35ml 'nips' & the following tasting notes are based on the whisky being undiluted. Adding a touch of water should help you access these flavours a little more easily.

As we say in Scotland.....'Slangevar'!

Our most local, Scotland's most easterly & one of the oldest operating distilleries in Scotland – Glen Garioch (pronounced 'Glen *Geery*' in the ancient Doric dialect still spoken in these parts) has been making its mighty malt in the quaint and historic market town of Oldmeldrum, near Aberdeen in North East Scotland, ever since 1797. Shielded from the world's prying eyes, deep in the fertile 'Granary of Aberdeenshire', and only ever produced in small, precious batches, Glen Garioch is a rare find indeed, but warmly appreciated by those who like a hearty Highland malt, non chill-filtered as nature intended, with a wholesome maltiness, honeyed sweetness and delicious creamy texture to savour.

Glen Garioch 1797 Founders Reserve (48%)

The nose has lots of caramel, vanilla & butterscotch – very sweet, with underlying nutmeg, spices, peppery. Mouth-coating on the palate, with some dryness – plenty of barley & cereal notes. For the finish, the grain continues – distant peat – quite warming, but not overly long, leaving a refreshed palate. Overall, the whisky is easy-going in style, with the intensity, texture & strength holding the whisky together very well.

£9.80

Glen Garioch Virgin Oak (48%)

Glen Garioch use virgin North American white oak casks for the entirety of the maturation for their Virgin Oak release. The approach of using brand new barrels for whisky is becoming quite a trend, and the big, bold flavours that come from this release are proof in the pudding. A nose of oat cereal with a sprinkle of brown sugar - pine breeze and a vanilla hum. A big, chocolate burst, with chewy toffees and sugar coated sweets on the palate, followed by the oak that you knew was coming, but it's surprisingly subtle - spices and cloves too - complex and tasty! Vanilla reappears on the nice, long finish, to calm down the oak spices.

£8.00

Glen Garioch 21 Year Old (43%)

The colour is gold-yellow. The nose detects wax and cereals (malt). The mouth, nearby cereals develops on ripe fruits (pear). The oily finish reveals honey and sweet spices. The particularity of this malt is it's finishing for 6 months in new barrels (this does not happen often in Scotland).

Glenmorangie 25 Year Old (43%)

The aroma is a pleasurable mix of the late summer scent of fruit orchards laden with cherries, plums and hedgerow blackberries that is melded with lavish chocolate and coffee tones followed by the sudden, icy clarity of fresh wild mint. The taste is big and full-flavoured, the effect is mouth-watering, chewy and then lightly mouth-coating. An intense and warm finish, heady with brambles and spices that melts softly away.
